Please reject NAB's petition 04-160. I can not possible imagine the logic the NAB used to get this petition submitted in the first place but it is a blantant attempt to restrict competition for their own gain. The programming provided by satellite radio providers is not using the public radio spectrum and should not be restricted by the FCC in any way. I am not a lawyer but this would seem like a clear case of First Amendment Rights.
Please do the right thing a reject petition 04-160.
